

# Problemi di collegamento al portale FLUXUS

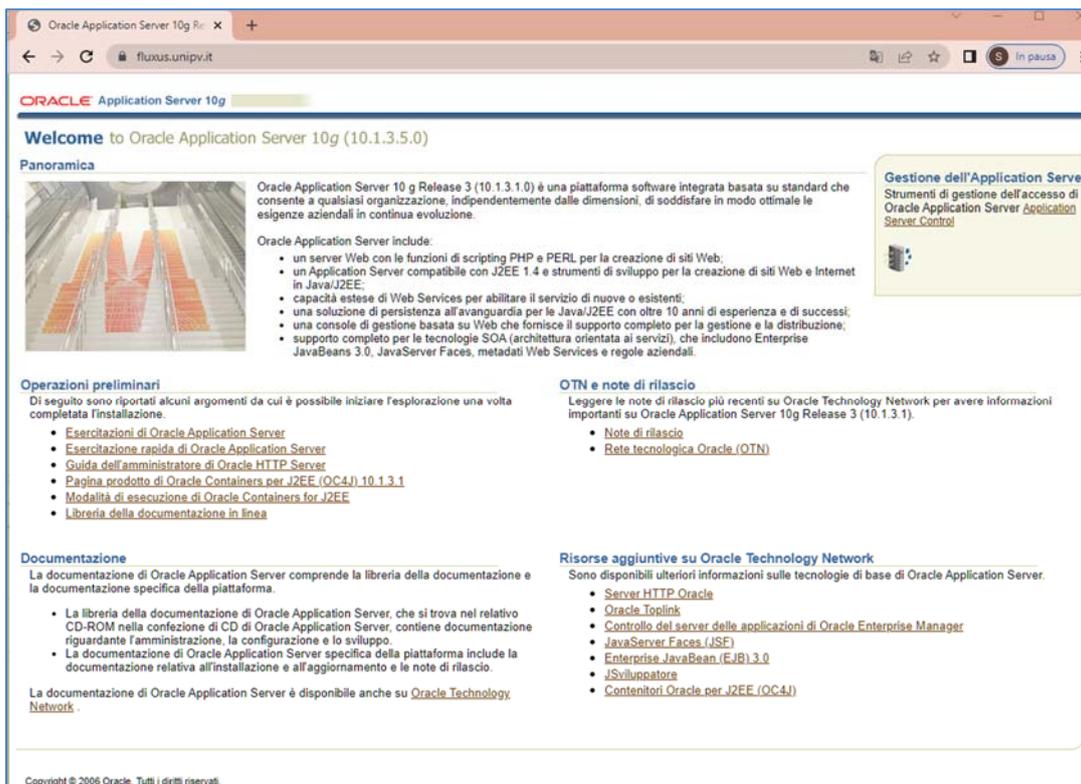

Se collegandovi alla pagina di Fluxus (<http://fluxus.unipv.it/>) anziché la pagina:

The screenshot shows the Fluxus website interface. At the top left is the Fluxus logo with the tagline 'BIBLIONAUTA'. To the right, contact information for the University of Pavia's Digital Library Service is provided. Below the logo are two navigation buttons: '>>> Area di PRODUZIONE' and '>>> Area di TEST'. The main content area contains several notices:

- Servizio Interprestito Bibliotecario Integrato:** A notice about the integrated library loan service starting in 2014, including a link to a weekly schedule.
- Verifica prestiti in corso:** A notice about checking loans in progress, with instructions and a link to verify loans.
- Mancato invio messaggi automatici di Fluxus:** A notice about missing automatic messages, explaining it's due to a server security update and providing instructions for resolution.
- Regole per l'inserimento manuale dei materiali in FLUXUS:** A notice about manual material entry rules, with a link to the document.
- AGGIORNAMENTI FLUXUS:** A notice about updates, with a link to the latest installations and a request to report any issues.

vi compare la seguente schermata:

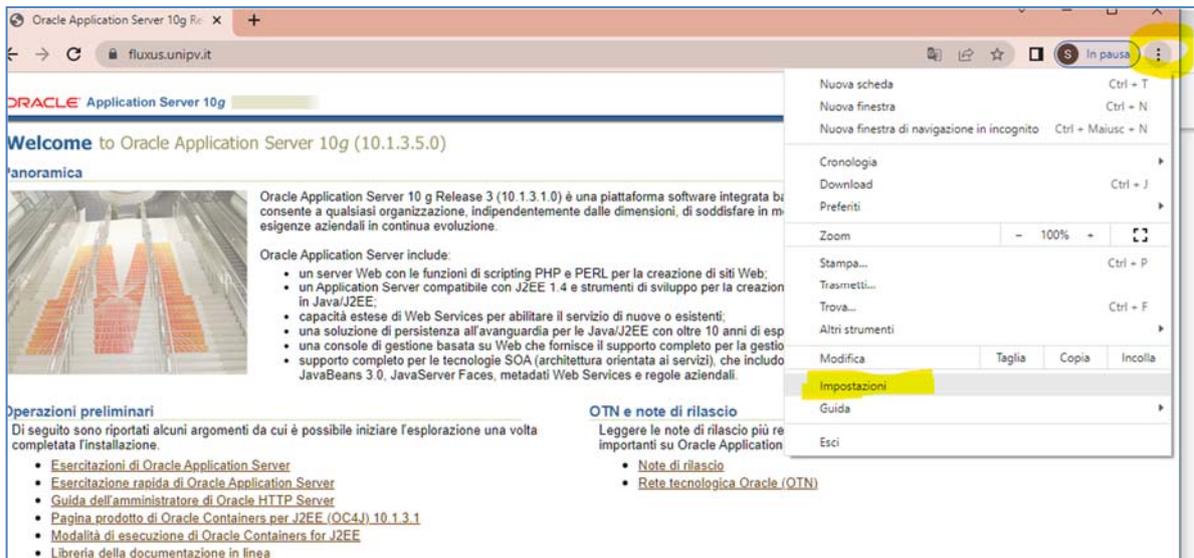

The screenshot shows the Oracle Application Server 10g website. The browser address bar shows 'fluxus.unipv.it'. The page title is 'ORACLE Application Server 10g'. The main content area includes:

- Welcome to Oracle Application Server 10g (10.1.3.5.0):** A welcome message and a 'Panoramica' section with an image of server racks.
- Operazioni preliminari:** A section listing links for installation and configuration guides.
- Documentazione:** A section providing links to the documentation library.
- OTN e note di rilascio:** A section with links to release notes and the Oracle Technology Network.
- Risorse aggiuntive su Oracle Technology Network:** A section with links to various Oracle resources.

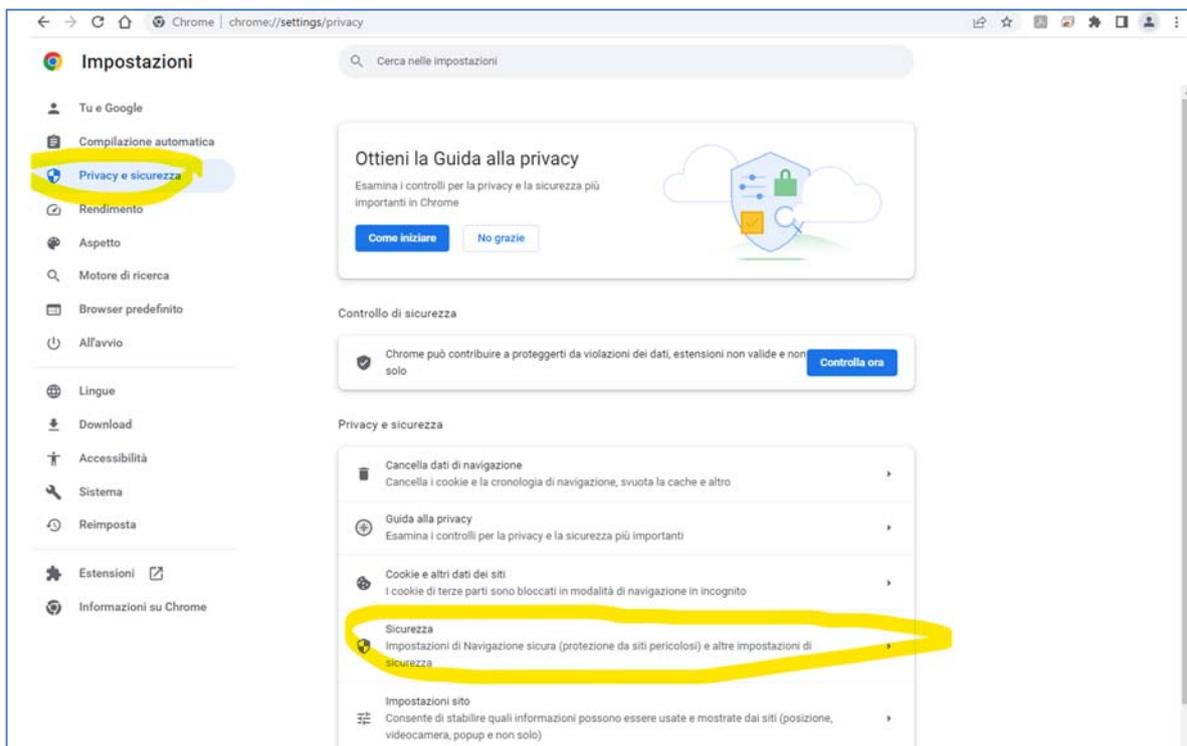

Significa che il vostro browser trasforma tutte le connessioni **http** in **https**.

Per evitare questo fatto è necessario modificare le impostazioni del browser come segue:

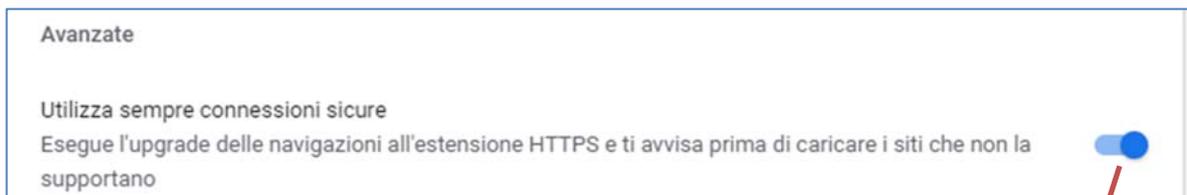

- Cliccare sui 3 puntini presenti sulla destra della barra del browser e poi aprire la funzione **impostazioni**

- Cliccare su **Privacy e sicurezza** e poi su **Sicurezza**:

- Scorrere la pagina centrale ed arrivare alla voce **Avanzate**

Disattivare la spunta e poi riprovare a collegarsi a  
<http://fluxus.unipv.it/>
